Community Health Improvement Plan Summit
Miami-Dade County Community Health Needs Assessment 2017 (CHNA)

*Implemented by:*
The Health Council of South Florida

*On behalf of:*
Florida Department of Health in Miami-Dade
In 2012, the Health Council of South Florida (HCSF) partnered with the Florida Department of Health in Miami-Dade to provide technical assistance and implementation of strategic actions to identify and prioritize areas for health improvement in the community.

- Approach utilized was the MAPP process.
- Resulted in the Community Health Improvement Plan (CHIP).
Mobilizing for Action through Planning and Partnership (MAPP)

- Strategic approach to community health improvement developed by the National Association of County and City Health Officials (NACCHO) in cooperation with the Public Health Practice Program Office, Centers for Disease Control and Prevention (CDC)
- Five year period 2013 – 2018
- Four MAPP Assessments
The 4 MAPP Assessments

- Local Public Health System Performance Assessments (LHPSA)
- Community Themes and Strengths Assessments (CTSA)
- Forces of Change Assessment (FOCA)
- Community Health Needs Assessments (CHNA)
MAPP Process

1. **Community Themes & Strengths Assessment**
   - Organize for Success
   - Partnership Development
   - Visioning
2. **Four MAPP Assessments**
   - Four MAPP Assessments
   - Identify Strategic Issues
3. **Formulate Goals and Strategies**
   - Formulate Goals and Strategies
4. **Evaluate**
   - Evaluate
   - Plan
5. **Local Public Health System Assessment**
6. **Community Health Status Assessment**
7. **Forces of Change Assessment**

The cycle continues with the implementation of actions.
What is the Miami-Dade CHNA?

- Defining the Miami-Dade CHNA
  - It is a systematic, data-driven approach to determining the health status, behaviors and needs of residents in Miami-Dade County

- The Miami-Dade CHNA Report, conducted in 2013, provided information for communities to identify the greatest needs of concerns to help with decisions to commit resources for the greatest possible impact on the community health status

- The assessment was conducted on behalf of the HCSF by Professional Research Consultants, Inc. (PRC)
Data presented in the CHNA covered:
- 12 neighborhood clusters plus one oversampled cluster
- Utilized rigorously tested survey instruments (CDC, BRFSS) and customized questionnaire (HCSF, PRC)
- Applied appropriate sample approach and design to ensure the best representation of the population surveyed
CHNA Process Map

Data Collection & Interpretation
- CHNA Data Platform
  - Demographics
  - Health Outcomes Data
  - Drivers of Health Data
  - Data Platform Report
- Community Assets & Resources
  - Other Secondary Data
