

Health Finance and Infrastructure

- **Use health information technology to improve the efficiency, effectiveness and quality of patient care coordination, patient safety and health care outcomes for all Floridians**
- **Assure adequate public health funding to control infectious diseases, reduce premature morbidity and mortality due to chronic diseases, and improve the health status of residents and visitors**
- **Attract, recruit and retain a prepared, diverse and sustainable public health workforce in all geographic areas of Florida**
- **Promote an efficient and effective public health system through performance management and collaboration among system partners**

Strategic Issue Area:

Use health information technology to improve the efficiency, effectiveness and quality of patient care coordination, patient safety and health care outcomes for all Floridians

HP2020 Goal: Use health communication strategies and health information technology (IT) to improve population health outcomes and health care quality, and to achieve health equity.

SHIP Strategy: HI1.1 Connect providers and electronic health record systems in a network that consists of a State-Level Health Information Exchange, Direct Secured Messaging and local health information exchanges and gateways.

SHIP Objective: HI1.1.1 By Dec. 31, 2012, no less than 1,500 health care providers will be registered to exchange data by using direct secured messaging.

Local Strategy: DOH MD Information Technology will ensure electronic health record systems and data transmission are available.

Local Objective: By June 30, 2019, no less than 1,500 Miami-Dade health care providers will be register to exchange data by using direct secured messaging.

Current Year Data: Miami-Dade health care providers registered to exchange data by using direct secured messaging (Yes=1/No=0)
